

PADI APP

The PADI Dive Shop Locator
has **Gone MOBILE**

with the
i-Phone & Android Mobile APP

Take a tour of
how the PADI App works

PADI APP

Boot Screen

This is what you see when waiting for the app to quickly load. It takes just 2 or 3 seconds.

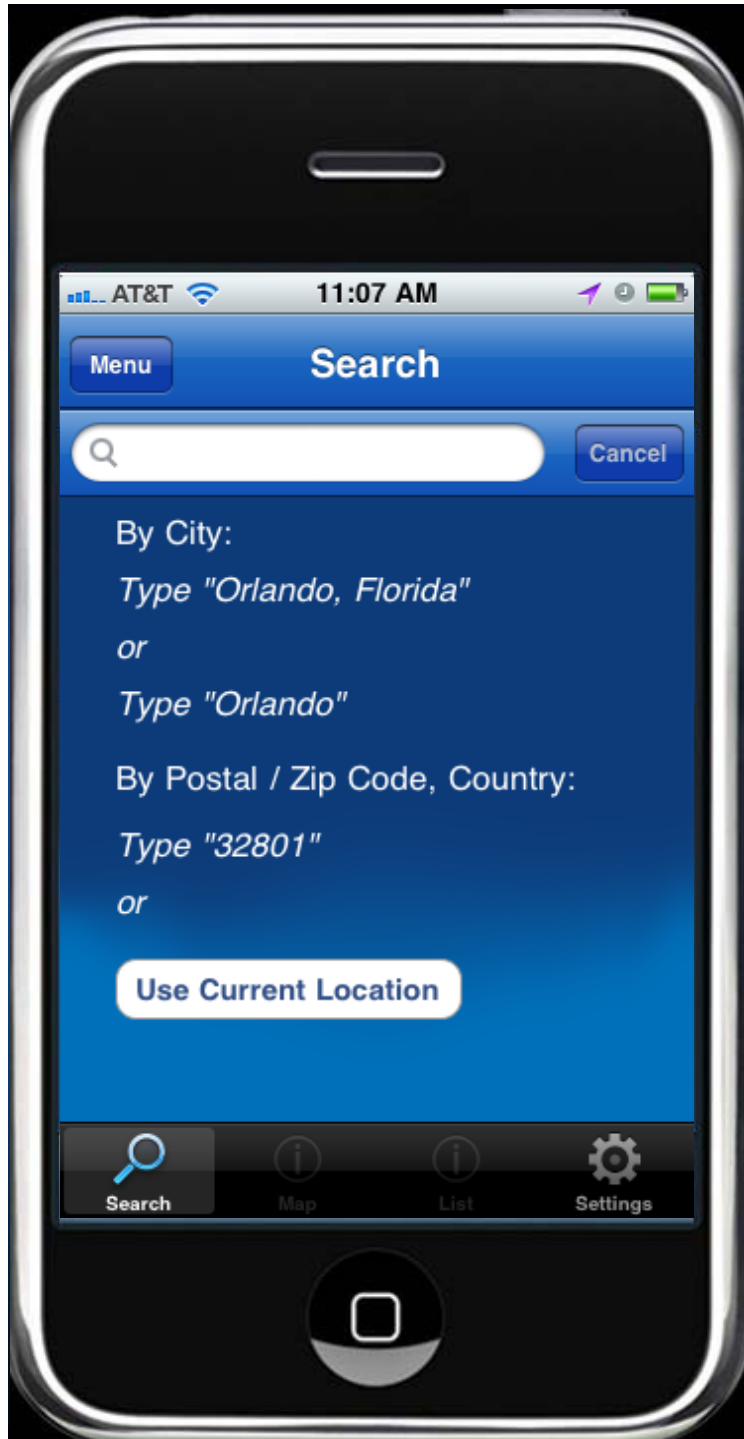

PADI APP

Selection Screen

This is where you select which function you want.
Right now the PADI APP has one feature,
which is the Dive Shop Locator.
In the future more features will be added.

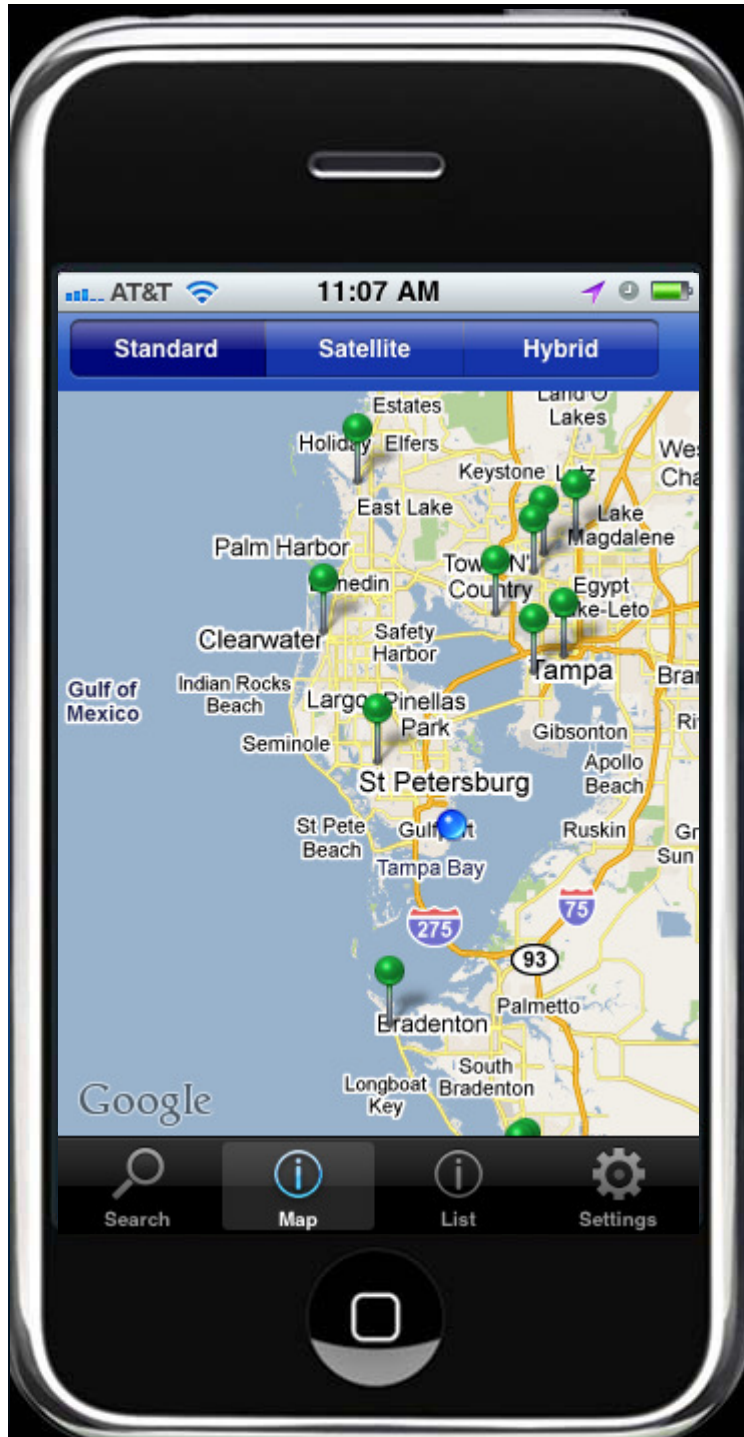

PADI APP

Search Screen

This is where you enter criteria for how you want to search. You can choose to search by City, State, Zip Code/Country, or use the current location you're in!

PADI APP

Map Results Screen

You can view all the results on the map.

PADI APP

Map Results with Screen Balloon

As you mouse over one of the pins, a balloon appears that allows you to immediately call the dive center or resort or you can click on the blue arrow to see more information about it.

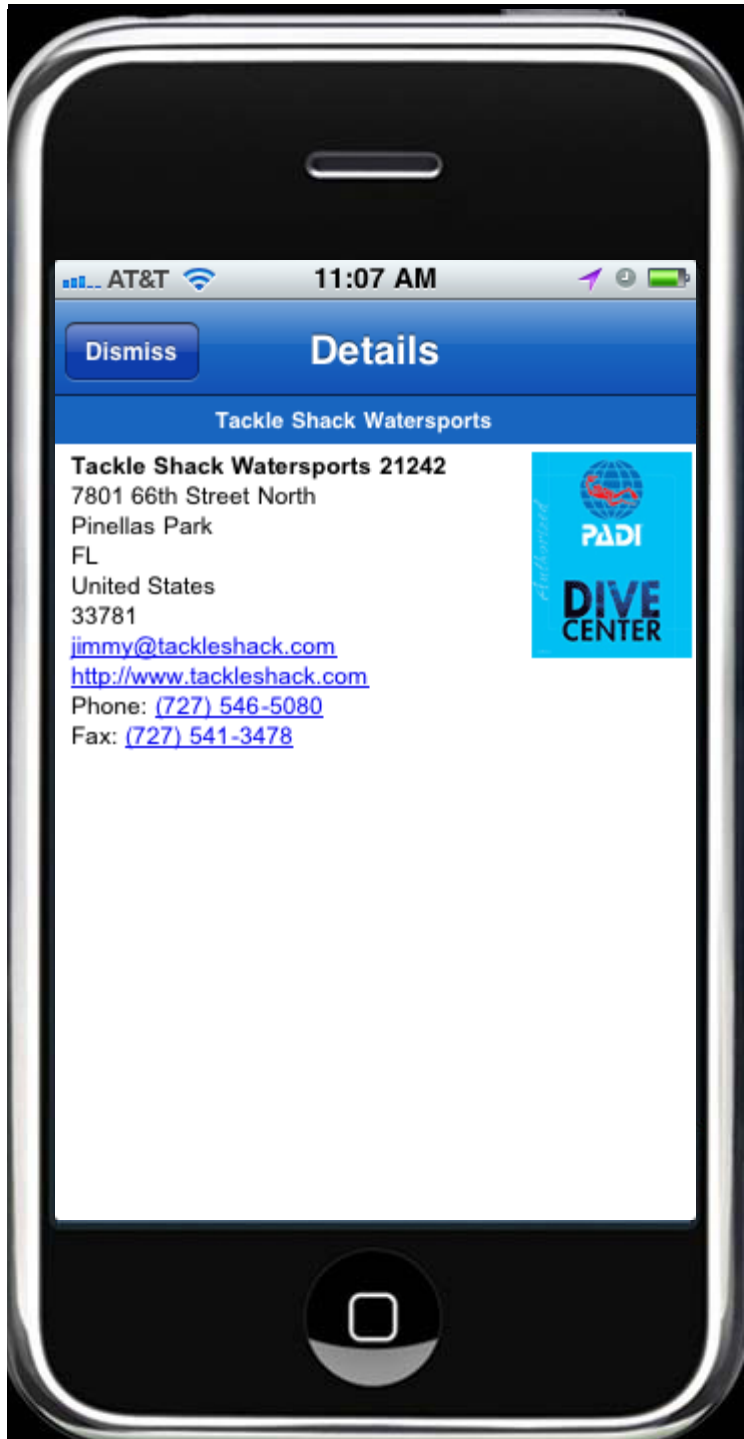

PADI APP

Details Screen

When you click the arrow for more information, you see this screen that gives the contact information and the dive center or resort rating (so you know if it is a PADI 5 star for example).

Some enhanced listings will show more information here like business hours, courses offered, brands offered, etc.

If you click “Dismiss” you go back to the map screen or list screen of your search results

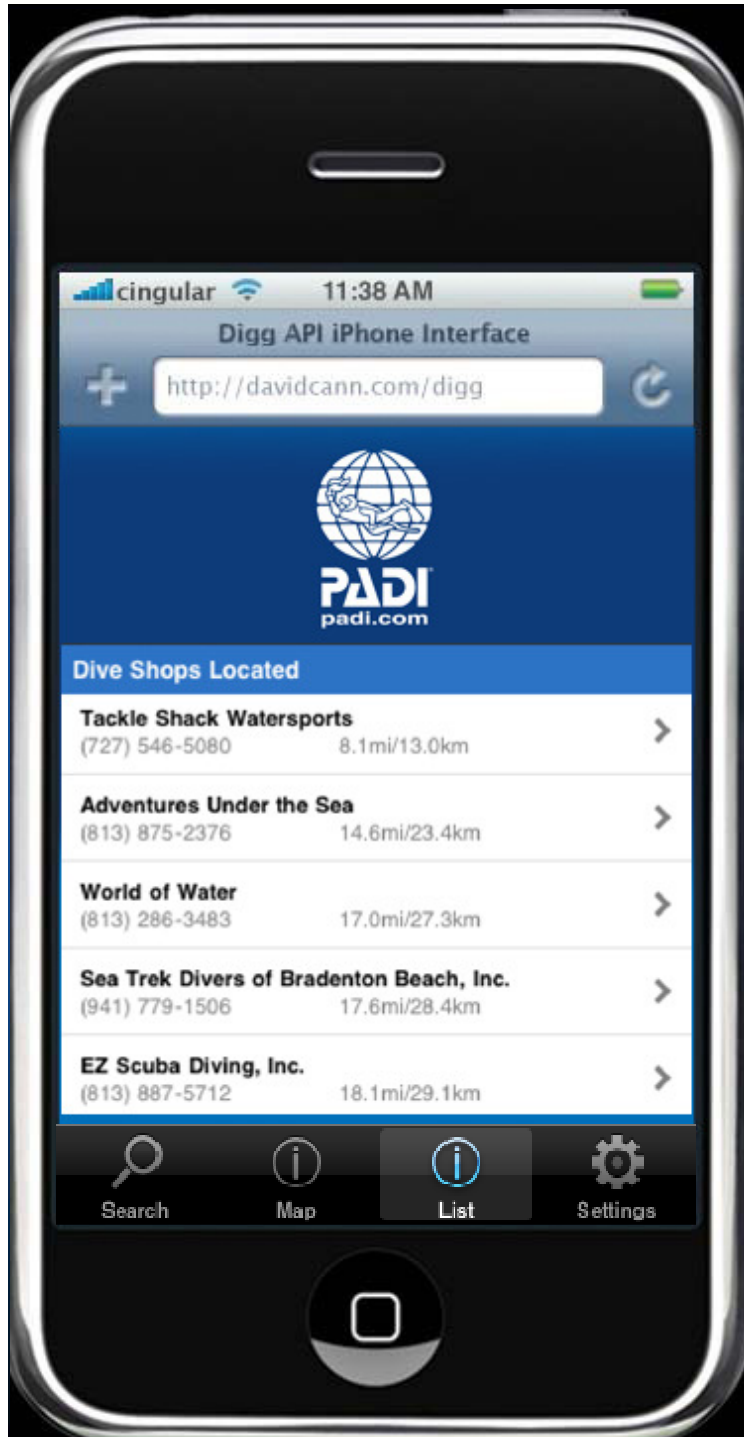

PADI APP

List Screen

If you'd rather view the search results in a list format you can click on the "list" icon on the black menu bar at the bottom to see results in order of closest to your search criteria.

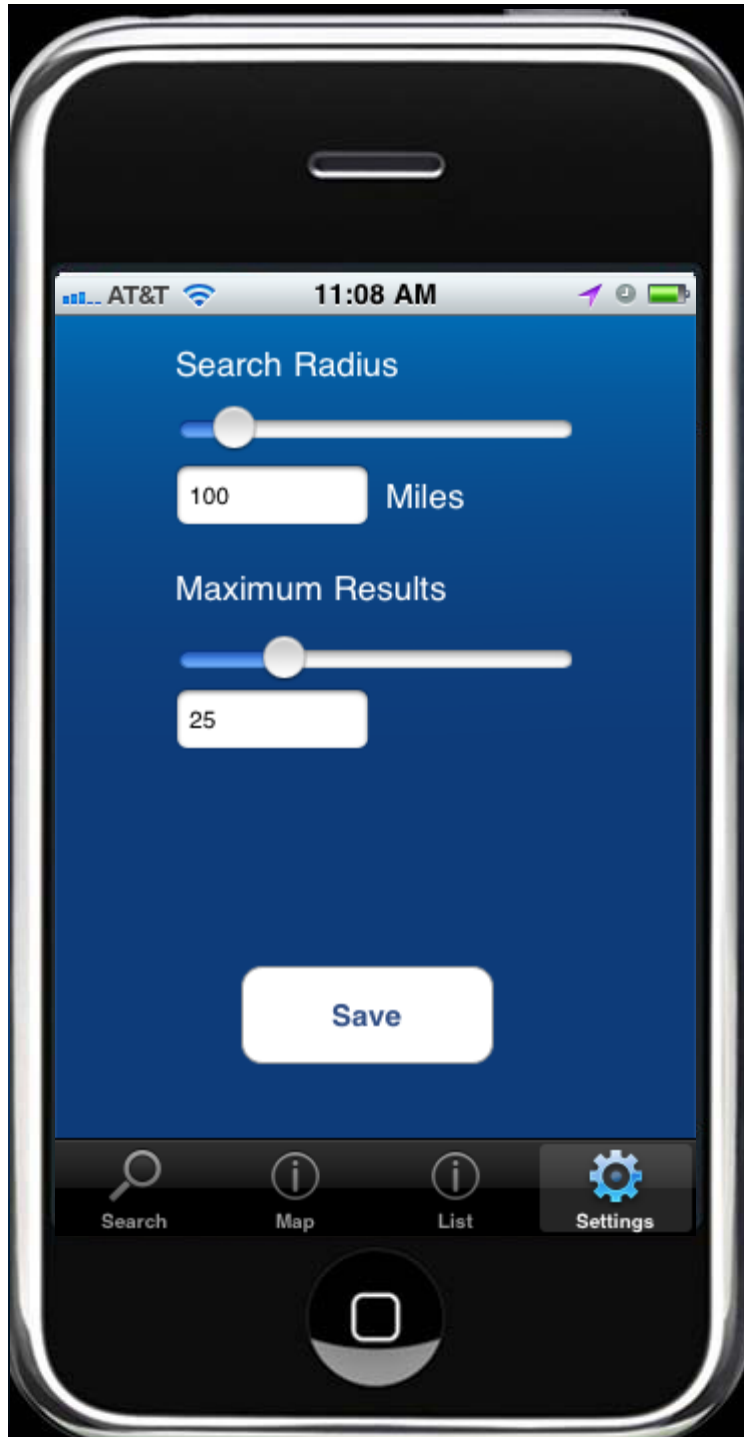

If you click on the arrow key to the far right, you go to the details screen for that listing.

PADI APP

Settings Screen

If you click on the “settings” icon on the black menu at the bottom, you can customize the proximity for your search results.
