

PADI course credits for Nationally Recognised Training and Certificates of Education in Australia

Nationally Recognised Training (NRT) – Nationwide

PADI Asia Pacific Pty Ltd is a Registered Training Organisation (RTO), [ID#6729](#). PADI's RTO complies with the National VET Regulator (NVR) standards and is registered with the Australian Skills Quality Authority (ASQA) – Australia's national regulator to deliver Vocational Education and Training (VET) qualifications.

This allows PADI's RTO to issue Nationally Recognised Training (NRT) certificates, called statements of attainment, to students who complete their PADI or EFR course in Australia with an authorised, PADI RTO-registered instructor. These certificates may credit towards higher level certificates or diplomas within the Nationally Recognised Training system in Australia.

The courses available include various diving courses (mainly from the Sport, Fitness and Recreation Training Package) and non-diving courses (mainly from the Health Training Package). Below is a shortlist of the most common courses. For a full list of recognised training currently offered through PADI's RTO please click on the provided web link and look under "Scope".
