DEVOPS ENGINEER/SYSTEMS ADMINISTRATOR

PADI, the global leader in Ocean Exploration, is searching for a full-time DEVOPS ENGINEER/SYSTEMS ADMINISTRATOR to join our global Information Technology team. PADI offers its employees a unique culture centered around an active lifestyle, fun and hardworking colleagues, interesting work, competitive salary and outstanding benefits. We are an amazing company searching for amazing people to join our team!

Reporting to the Sr. Director Core Systems & IT Operations at PADI Worldwide, PADI is seeking a well-rounded DevOps Engineer/Systems Administrator with experience managing systems in a mixed Linux and Windows environment. This position requires the ability to communicate clearly and concisely, ability to change as knowledge and conditions change, whether those changes are technical, or business driven and the ability to continuously seek improvement by acquiring new more relevant knowledge. As a DevOps Engineer/Systems Administrator, you will be working closely with the IT. Operations team and Engineering to support and maintain cloud and on-premise infrastructure.

What You Will Do
- Support production Windows and Linux servers.
- Manage network and application monitoring tools.
- Help troubleshoot latencies at the hardware, software, or network level and identify root causes.
- Troubleshoot application alerts from monitoring tools and flow necessary playbook steps to resolve and escalate appropriately.
- Assist the team to standardize, automate and document setup of development and production environments.
- Help define best practices for source control, continuous integration automated testing and release management.
- Collaborate with peers on work estimation/planning and implementation of new versions/features of tools.
- Build tools for internal use to support software engineering best practices.
- Bring new automation technologies to improve speed and quality of releasing products.
- Help implement new and improve existing monitoring and trending solutions to assist in the team's ability to identify and respond to issues.
- The position will require being available to perform maintenance during non-business hours and over the weekends.
- Help to ensure 24x7 reliability and availability of our products and services.
- Plan, organize and coordinate work assignments and prioritize workload.

What You Will Need To Be Successful:
- Bachelor's degree (B.S.) in Computer Science, Electrical Engineering, or a related field and/or equivalent work experience plus 5+ or more related experience.
- 5+ years of experience in a DevOps role with different Linux distributions.
- 5+ years of robust Windows systems administration experience.
- Working knowledge of AWS solutions and components such as EC2 instances, S3, ELB, VPC, SQS, IAM, Route 53, RDS, DynamoDB, CloudWatch, CloudFront and other service offerings.

- Proficient in automation and configuration tools such as CloudFormation, Ansible, Chef
- Proficient in administering source control systems (TFS, SVN, GIT) and branching policies.
- Familiarity with application development using the .NET Framework.
- Strong coding and scripting skills (.Net, C#, PowerShell, Python, PHP, cmd scripting).
- Very good understanding of SQL and relational Databases.
- Experience with one or more of these technologies: GitHub, Jira, Confluence, Ansible, BitBucket.
- Experience with multiple cloud computing and storage platforms (AWS, Azure)
- Strong background and experience with Windows and Linux configurations.
- Experience with monitoring tools (Datadog, New Relic)
- Possess a solid understanding of both network and systems security.
- Demonstrated ability to coordinate cross-functional work towards task completion.
- Understanding core business processes (Financial and Distribution) is a plus

Founded in 1966, PADI has grown consistently through our 57 years in business, continually raising the bar for the industry we are all so passionate about. We know who we are as a company but never let that hold us back from reinventing ourselves and keeping our mission modern and relevant. One thing that stays consistent is our mission to be "The Way the World Learns to Dive". PADI has certified over 29 million divers during our history, an achievement no other scuba diving agency can claim. We are committed to our purpose to Seek Adventure—Save The Ocean.

PADI strives to create a work environment that respects individual contribution while maintaining a strong team approach for successful execution of business objectives. The executive team believes in a work-life balance that enables employees to meet their personal and family needs with flexible hours and a robust benefits plan.
